**Subject:** Entry into US-national-phase ~~and the first Amendment~~ of patent application No. PCT/CA2003/001312

**Ref:** PCT/CA2003/001312: System of Super Super Decoupled Loadflow Computation for Electrical Power System

Dear Sir/Madam,

Enclosed please find:

1. Amended copy of description, claims, abstract, and 7-figures of my application no. PCT/CA2003/001312 (51-pages)
2. A marked-up in red ink copy of contents of item-1 above for amendment against as filed and published contents of the application PCT/CA2003/001312 (26-pages with content on both sides)
- ✓ 3. Filled and signed: Recordation form cover sheet (form PTO-1595), Transmittal letter to the United States (PTO-1390), Credit Card Payment Form (PTO-2038), Declaration for Utility or Design Patent Applications (PTO/SB/01), and Correspondence address indication form (PTO/SB/81) (8-pages)

Claim-1 is the elaborate method of control in power network shown by Fig.5 involving a step of Loadflow calculation, which is proposed to embody inventions characterized in claims- 1 & 2. In claim-1, restricting rotation angle, using network shunts, and calculating modified real power mismatch steps are inventive. Claims-3 to 9 presents simple practical system and method described in detail that embody inventions of claims-1 & 2, establishing the practical utility of inventions. The practical system and method presented in claims-3 to 9 is similar to the one used to claim utility of the invention in US patent number 5081591 dated January 14, 1992: "Optimizing reactive power Distribution in an Industrial Power Network". Thus claims 1 to 9 follows and combines the method of claiming in the US patent 4868410 & US patent 5081591. However, if a method patent can be granted as in the case of US patent 4868410, it is proposed to remove claims-3 to -9, corresponding description, and Figs.6 and 7 from the application. I expect examiner to advise on this.

As filed claim-2 is merged into amended claim-1 as a step of "calculating modified real power mismatch as...". Other two steps of "forming and storing factorized gain matrices..." and "using

IAP20 Rec'd PCT/PTO 01 MAR 2006

Para [021] to [029] under the heading "SUMMARY OF INVENTION" in this amendment replaces as filed content on pages-5 & -6 under the heading "Disclosure of the Invention". Para [037] to [056] under the heading "DESCRIPTION OF A PREFERRED EMBODIMENT" are added new for clarity that support claims, without adding any new description of claimed new invention. For more clarity of the amendment, marked-up copy should be referred. **Equation numbers in the application copy as filed are changed in this amendment copy because of expansion and reorganization of equations without adding anything which was not present in the application copy as filed.**

I have made this application as individual, and therefore, I claim status of small entity. Payment fees for charging to my credit card account are calculated for small entity.

Sincerely,

Suresh Patel
